

DXC Technology and Liverpool Women's NHS Hospital Foundation Trust

Accelerate the journey to digital healthcare transformation

DXC helps healthcare organizations tap into leading-edge solutions that connect people, processes and data to help improve patient outcomes. As the world's leading independent, end-to-end IT services company, with more than a half century of industry experience, we offer unparalleled insights and cutting-edge healthcare solutions to accelerate our clients' digital transformation journey.

DXC robotic process automation — transforming clinical and back-office tasks

DXC's Agile Process Automation (APA) solution provides a dynamic digital workforce to help perform voluminous and repetitive tasks. Intelligent automation can transform clinical and administrative processes in NHS, freeing up precious clinical capacity and reducing the administration burden across Trusts. Leveraging DXC's automation expertise combined with NHS' clinical systems knowledge and digital transformation strengths, the solution helps employees reduce costs and save time to focus on more value-added efforts.

DXC Lorenzo — EPR of choice for 21 NHS Trust healthcare systems

DXC deploys digital solutions for healthcare and life sciences organisations around the world. In the UK alone, 75 percent of the NHS Trusts are DXC clients.

DXC has been providing electronic patient record (EPR) software and digital transformation services to the NHS since 2010 with 21 NHS Trusts currently using DXC Lorenzo, involving more than 70 individual hospitals and the maintenance of more than 100 million EPRs.

As a next-generation EPR, Lorenzo is interoperable, expandable and designed to be the heart of our clients' healthcare architecture. Lorenzo is also system-agnostic, allowing for easy integration with other systems. DXC Lorenzo enables NHS hospitals to design and implement innovative care plans that help improve the patient experience every step of the way.
